Athmakuri Uday Kumar

PROFESSIONAL SUMMARY

With less than a year of hands-on experience in Power BI, I bring a fresh perspective and dedication to leveraging data visualization tools to support decision-making processes and drive business insights effectively.

EXPERIENCE

DATA ANALYST IN MPHASIS

SEP 2023-MAR 2024

PROJECT SUMMARY

Title: Sales Performance Dashboard with SQL Integration.

Environment: SQL, Power Bi, Data Modeling, Data Analysis Expressions.

Role: Power BI Analyst.

Responsibilities:

- Extract sales data from SQL Server databases using SQL queries.
- Ensure data integrity and consistency during the extraction process. Integrate multiple datasets from different SQL tables or databases into Power BI.
- Design and implement data models in Power BI to support complex relationships and calculations.
- Transform raw data into meaningful metrics and KPIs for sales performance analysis.
- Develop interactive dashboards in Power BI to visualize sales performance metrics.
- Design intuitive charts, graphs, and KPIs that provide insights into sales trends, regional performance, and product comparisons.
- Maintain and update the Power BI dashboard with new data sources and refreshed data on a regular basis.
